

# Centrifugal fans

## Spare parts guide

## Centrifugal fans

#### **Benefits**

BAC centrifugal fans are designed, tested, manufactured and rated by BAC for **optimum performance**. These centrifugal fans are very quiet for minimal surrounding noise.

#### Standard features

- Protected with the <u>Baltibond hybrid coating</u>. Perfect for use in the moist cooling tower environment, ensuring maximum service life.
- Nearly noiseless.
- Shipped with the necessary hub clamps, hardware and adhesive for installation.

#### Caution tip!

Selecting a fan requires knowledge of the cooling tower system curve (air flow, pressure drop). Changing to a non-original fan can severely deteriorate your cooling tower thermal performance and increase your process energy costs.

Want to replace the centrifugal fans of your BAC cooling equipment? Contact your <u>local BAC representative</u>.
